Patent Mill Wheels.

Tinbey's Patent
Vo Vent Cast Iron Water Wheels
—for—
SAW MILLS,
Vented by T. R. Tmbey of Cato N. Y.

THE undersigned would invite the attention of the Public to the above named WHEELS, which have been thoroughly tested in *Competition* with all other popular

SAW MILL WHEELS

use at the present time, and they can confidently commend them with the same head and quantity of water applied as possessing and combining more *Length and Speed*, and giving a more uniform and *steady Motion* in and out of the cut, and therefore liable to break cranks,) and will also run longer *than more Lumber* under a low head than any Wheel in use:

Another advantage which this Wheel has over others is that it is constructed with but Two Vanes the discharge of water which makes the openings larger and allows the drift stuff to escape without filling up the Wheel

Persons wishing to adopt this BEST WHEEL will do well to call and examine before purchasing elsewhere

I would also call the attention of Mill Owners and Operators to

Valentine's Patent
Reversing Centrifugal Water Wheel
—FOR—
UPRIGHT SHAFTS,

WHICH are adapted for driving all kinds of Machinery in Manufacturing establishments or Mills and are made of different sizes to give any amount of power required and run the Water Wheels have acquired by the successful operation of several hundred of them already in and use, we feel confident in recommending them as combining more advantages than any other Wheel for perpendicular shafts, now used.

For a residence of the merits of this Wheel we would refer to the following extracts from the report of experiments made with the same, by HIRAM A. BEARD Esq., *Civil Engineer*—Lowell

"It is who is well known as one of the most scientific and experienced practical Engineers in the country

"This wheel is formed with curved floats the water depending upon the size and vent of the wheel each extending so far around the Wheel at when the water arrives at the jet its pressure is so far expended that it falls very nearly next to the Wheel The Wheel is inclosed in a circular wooden curb or flume, in which the water is admitted the full head of the column being sustained the stationary plate underneath the Wheel so that has no downward pressure upon the Wheel which stands perfectly free in the column of water, by this arrangement all the friction on the step and bearing on the Wheel is avoided, and so much of power saved which in the ordinary mode of operation is wholly lost

This Wheel is adapted to low as well as high heads of water and will run as well in back water cut off providing the head rises in a freshet, as in the back water Both A Wheel with the jets partly gauged for a high head will not answer for a low one, and vice versa so as the head increases the width of the jets should be proportionably decreased, so that the water may not use to waste but give its best effect to the Wheel

In proof of power the trial above mentioned this Wheel is superior to the best constructed Cast Wheels and it has the great advantage of working with good effect in situations where the *Breast* Wheel would be worthless or less liable to accumulations easily accessible when they are needed, is much less in cost more durable, it takes very much less room in a mill or shop — plenty of structure durability of parts, convenience of application and excellence of power proved by the grand points of recommendation for the Wheel

HIRAM A BEARD *Civil Engineer*"

*All sizes of the above Wheels with all the BEST and most IMPROVED patterns of Mill Gearing, Machinery, &c, Shingle, Clapboard, Sapping, Lath and Box Machines;

Steam Engines and Boilers,

The Great Remedy for Gonorrhœa

GLEET, Stricture and all analagous complaints is Dr DOUGLASS'S ARABIAN PASTE. Dr Douglass is well known having practised in the principal cities in the Union during the last 30 years He mainly relies on for introducing the Paste in this public manner is the conviction that there are thousands of ill treated complaints in this city—thousands of individuals who are going down to premature graves by taking the quackish drugs of quacks

Dr D most solemnly affirms that during his practice of forty years this Paste has never in one single instance failed to effect a cure in a few days, without any change of diet or hindrance from business. He has had some of the most stubborn cases—cases that have resisted the regular course of treatment adopted by our first physicians for months and even years but after taking the Paste for a few days the angry symptoms disappeared and the patients were discharged entirely cured

Dr D would particularly request those females who seek quack nostrums would purchase only one box of the Arabian Paste we should not see so many emaciated pale faced and sallow countenances as we do at the present time

Dr D is sure that no one should fail to effect a cure in the shortest possible time, ten times the price paid for it will be given the purchaser on returning the empty boxes

For sale only by the original inventor and sole proprietor Dr PETER G DOUGLASS at his Office No 55 Union street Boston at $5 per box where he can be confidently consulted on every disease incident to the human frame and the patient relys upon the most beneficial course of treatment that can possibly be adopted

DR. CUMMINGS'S Compound Extract of Sarsaparilla and Dock.

THE articles above named are the principal ingredients of this medicine With these different vegetable virtues are combined and designed to render them more active and consequently more immediately effective

The Dock or rather a species of it now ranks as a medicinal plant second to no one of the vegetable kingdom in the hand of a judicious and even not whom the proprietor has consulted in the preparation of the compound he has succeeded in overcoming the difficulty of preserving the extract of the root for any considerable length of time

For many years the proprietor has tested in his practice the efficacy of the principal substances of the compound, and is perfectly satisfied that they possess all the properties which have been ascribed to them Recently he discovered the chief of uniting them which has resulted in the production of the compound in the form it now is found to exist in harmonious and to lose none of the qualities which they separately possess

A larger portion of Sarsaparilla is soluble than has generally been supposed Hence inactionate to be relied on and heretofore supposed to be of little value, subjecting the root to the action of the menstrua usually employed in extracting its virtues for a long time, within it be or any other accelerating agent None is permitted to be used in the compound that has not been often tried by this process and that has been less than a year in preparation

The Compound is recommended as a Sudorific Evacuant Alterative Expectorant, and Mercurial Diseases Also for the many complaints arising from sedentary employments occupations of a harassing and fatiguing nature intemperate application exposures to extremes of heat and cold overtaking the physical powers and other abuses of the constitution among which are Female Fits Fallen Affections of the Uterus Bilious Complaints and dyspepsia or Indigestion

In disease of worm of matter with which the proprietor is more familiar in his practice in this vicinity than in any other section of the country he is particularly efficacious both as a remedy and preventative

This medicine has been for some time in use in this city, where the proprietor has passed nearly half a century of his professional life It was at first merely prescribed by him while in practice and it is believed to be in fact a truth his medical breath in general to whom he is known

Prepared only by Dr Stephen Cummings and sold at wholesale and retail by Joshua Burgess No 145 Middle street and Edward Jason No 133 Middle street—only agents for Portland

☞ The editor of the Washington Union, the organ of the Administration, declares that Gen Cass will veto the Wilmot Proviso, and the editor of the Union is almost certain that Gen Taylor will not veto it This is precisely the view we take of the case, and yet, strange to say, there are Whigs who make themselves ingenious and rack their brains to make it out that Gen Taylor will veto the Wilmot Proviso, and is in favor of the extension of slavery, and on this account they must in conscience, oppose him It seems to us that a little more regard to conscience would cause these men to take a different view of this subject from that in which they now delight, and to give their earnest support to a man so enlightened and trust worthy and so devoted to the public good as does Gen Taylor He is swayed by no prejudices—stops at no merely sectional issues, but with a large-hearted and right minded desire to see the whole country prosper, goes forward in the discharge of a Patriot's duty with a Patriot's honesty and independence Of all men in this broad world, Gen Zachary Taylor is the man for the present emergency in our country, and his elevation to the Presidency will secure peace, quiet, prosperity and honor to the country The heart and the hope of the country are turned towards him and there is no room for a reasonable doubt as to the certainty of his election

☞ The EAGLE Engine Company, No 3 appeared in our streets on Monday evening in uniform with its Franks and accompanied by the Citizen's Band They marched well and made a very fine appearance This company with their Engine and apparatus will take passage this morning on board the steamer State of Maine, for a pleasure excursion to the city of Portland They are a fine company of men and will do no discredit to the city, wherever they may represent her They are bound to have a good time, and we hope will return in safety and refreshed and animated

The Portland Umpire states that a Hook and Ladder company from East Cambridge, is to visit that city this morning accompanied by Whites Cornet Band, the guests of the WASHINGTON Hook and Ladder company

The EAGLE Engine Co, of this city it says will be received on their arrival by the Casco Engine Co, No. 1, in uniform accompanied by Chandler's Brass Band They will march through the principal streets and partake of a collation with the Casco Company at six o'clock at Union Hall On Thursday the Bangor Company with the members of Engine Co No 3 the Volunteer, will make an excursion to the Islands and on Friday they will be the guests of the Casco Company, with whom they will dine at the Verandah and be escorted by them to the Bangor steamer in the evening

Another Engine company the PENOBSCOT No 4, from East Boston, is to visit the city on Tuesday accompanied by the Boston Brass Band This visit will be received and entertained by the PORTLAND Engine Co No 5

There will be five Brass Bands in Portland at once viz White's Cornet and Bos on Brass Band of Boston Chandler's and the Casco Brass Band of Portland, and the Citizen's Brass Band of this city

☞ Charles Augustus Forbes son of Mr Joseph F Forbes, of this city aged seven years was drowned in this city yesterday afternoon — He fell from the railing of the bridge crossing Kenduskeag Stream, the alarm was instantly given and a man from the machine shop hereby plunged in to the stream and brought the boy from the bottom But although he was in the water but a few minutes scarcely over five, and all the usual remedies applied, yet he could not be restored.

North Carolina

It is admitted with all becoming gravity by locofoco authority that the gallant whig old North State has elected a Whig Governor and a Whig Legislature The locofoco papers must upon it that the Whig majority is nope what dimunished but in order to reach such a result they compare the returns with those of 1840 when the Whigs carried the State by very nearly eight thousand majority The true vote by which to compare is that of 1844, when Mr Clay's majority was 3945 and upon such comparison of the returns which have been received from the counties of Wake Cumberland Sampson Tyrrell Chatham Iredell and Camden we find a Whig gain of two hundred and forty votes

The returns which have reached us have come by telegraph and through locofoco sources and we want the details for the present, contenting ourselves with the result even through the predictions of our opponents North Carolina is caught out Whig in all departments and will give an increased majority for Gen Zachary Taylor

☞ The Legislature has been received at Washington that very serious revolutionary movements had appeared in Cuba and that there had been desperate fighting between the Government troops and the revolutionists Several hundred were killed upon both sides and the greatest confusion was prevailed to reign in the island The Queen had fled to Spain

☞ A letter to the proprietors of the Boston Traveller states that the impression at Buffalo on Sunday evening was that Martin Van Buren would get the nomination of President and John P Hale or Levi Woodbury that by the convention to be holden on the 9th inst.

☞ The Bath Tribune states that on the 28th ult a boat upset in Booth bay harbor by which disaster two of the four men in it were drowned One belonging in Portland by the name of Masterves and the other in Castine

☞ The Kilmiste Family among the most popular singers we have had in our city for a long time are to give another of their interesting and beautiful entertainments at the City Hall on this evening,

☞ Thanks to Adams & Co's Express for papers received yesterday, in advance of the mail

☞ Cast iron extended as have been presented by a citizen of Wilmington DE

We were about to prepare an article on the subject of the recent developements in relation to the Texas fraud, when the following article better than any thing we could say, met our eye in the Albany Evening Journal We wish we had room for the letter referred to

The Texas Iniquity—A Chapter of Secret History.

We publish, in another column, a graphic and simple history of the Texas fraud—We copy it from the columns of the New York Evening Post It is compiled of two letters one from Ex-Senator Tappan, of Ohio and the other from F P Blair, Esq formerly Editor at Washington These letters make grave charges against the President of the United States They hold him up before the world as an unscrupulous demagogue wholly destitute of moral principle They prove him to have deliberately duped at the election pledge, and by so doing to have plunged the Nation into a War with Mexico

The basis of these charges is briefly as follows

The Locofoco Senators were generally anxious for the annexation of Texas But they knew well that it could not be effected without an appeal to arms with Mexico, War would be unpopular A few of the majority Senators deemed this a favorable opportunity to have it declared their determination to vote against the proposition was made to avert and defeat it by the Whigs These propositions were necessary to secure affirmative action It was proposed first to take up the joint resolution which the House had adopted authorizing a War by providing for negotiations This was to be followed by a proposition to annex Texas by negotiation with the authorities of that country

But it was feared as the resolution would have to be passed by the expiration of Mr Polk's term that he would not agree to it Mr Slidell was therefore sent to Mexico with secret instructions to buy a cession of territory and if refused to bring on a War Mr Slidell was unsuccessful and returned Mr Polk was apprised of the failure of the mission and then commenced preparations for War Gen Taylor was ordered to the Rio Grande Gen Scott was ordered to Vera Cruz Gen Kearney was ordered to New Mexico and Upper California Gen Wool was ordered to Chihuahua Gen Patterson was ordered to Tampico Gen Worth was ordered to Monterey Gen Taylor was ordered to Camargo Gen Butler was ordered to Camargo Gen Quitman was ordered to Camargo Gen Pillow was ordered to Camargo Gen Smith was ordered to Camargo Gen Lane was ordered to Camargo Gen Shields was ordered to Camargo Gen Hamer was ordered to Camargo Gen Cadwallader was ordered to Camargo Gen Twiggs was ordered to Camargo Gen Henderson was ordered to Camargo Gen Marshall was ordered to Camargo Gen Gaines was ordered to Camargo Gen Ampudia was ordered to Camargo Gen Bullard was ordered to Camargo Gen Ballard was ordered to Camargo Gen Ward was ordered to Camargo Gen Hall was ordered to Camargo Gen Hall was ordered to Camargo Gen Hall

DISEASES OF THE Throat and Lungs.

COUGHS and Colds the fruitful parents of Consumption, Bronchitis, Asthma Pleurisy and most other dangerous diseases are too often neglected until the foundation of the Stout fair Constitution is laid deep in the System A Physician is then called but what can he do? Nine cases out of ten he shakes his head and tells the afflicted sufferer that he has a settled Consumption and that he cannot live more than a few months. Such cases are not incurable, and the Patient in confirmation of this opinion does not stop to the proper remedy, but trusts the more dangerous Practitioner rather than the infallible evidence of experience and the most authentic testimony. On this ground is the only true one, the steady of

CONSUMPTION AND AFFECTION OF THE LIVER CURED.

Of Twenty Years standing!

CITY OF NEW YORK 1st Dec 184

This is to Certify that I, Megan Lavelace, Jersey City, have been troubled to draw back and pain in the side and chest for about eight years and general weakness of the system for a period of twenty years, and pronounced INCURABLE CONSUMPTIVE by the first physicians of Jersey City, have been induced to try Dr Vondersmith's Indian Cough Balm and Lung Balsam, after having tried many other remedies I have known of many persons to receive great benefit and I was induced to try Dr V VONDERSMITH'S INDIAN COUGH BALM AND LUNG BALSAM I consented to do so, and after using two bottles of the medicine according to directions and the result has been that I am restored to health a blessing I have not enjoyed for years until the present time I have only believe had I not made use of Dr Vondersmith's valuable Medicine that I would be now dangerously afflicted and in my grave Therefore I believe that for long a thing but justice, to attain the above facts so the public may know it to all the afflicted who may call upon me to administer to them I shall be pleased at any time to converse with the afflicted who may call upon me

Certificate from Col Jas Page editor of the Columbia Democrat Pa

OFFICE OF THE COLUMBIA DEMOCRAT

Bloomsburg Columbia co Pa, March 4 1848

Dr William Wright—Dear Sir—I am one of the many who are averse to quacks and nostrums has deprived them of the benefit of suffering from the use of good medicine As a matter of this influence I have seldom taken pills to be called but on last March when my whole system became deranged by my paper I was induced to try your Indian Vegetable Pills a trial and after having fairly tested their virtues for myself and family gave them a decided preference over every thing of the kind

In very little time the stream of life was unencumbered with the thick humor I took speedy relief from the use of your Pills by taking from four to six on going to bed when indisposed, have always been restored to health without loss of time and without the expense of a physician Wright's Indian Vegetable Pills possess the desirable merit of operating effectually with ease during the rest of the patient and in my case without producing even sickness at the stomach

Respectfully your friend, &c

LEVI L TATE

From the Delaware Republican Delhi N Y

Wright's INDIAN VEGETABLE PILLS—Although we don't particularly friendly to patent medicines we must confess that we have become a convert to their having had an opportunity on our own person of testing the efficacy For a gentle and sure, and at the same time powerful and though effective Wright's Indian Vegetable Pills are decidedly the best we have ever seen We believe there are but few more thorough medicine is required a perfect three or four of these pills, taken on going to bed will be found effectual in clearing the stomach and restoring the bowels to a healthy and vigorous exercise, and take pleasure in recommending the Pills to the public

Look out for Counterfeits!

If we are coated with sugar as others are made of insoluble, in outer appearance the original are the safest course is to purchase from the agents only one or more of whom will be found in every town and county in the State

Patent Mill Wheels

Tinbey's Patent

Two Vent Cast Iron Water Wheels

FOR

SAW MILLS,

Invented by T. R. Tinbey of Corinth

THE undersigned would invite the attention of the Public to the above named WHEEL which have been thoroughly tested in Corinth with all their popularity

SAW MILL WHEELS

in use at the present time, and they can confidently recommend them with the same head and quantity of water applied, as possessing an decidedly *Strength and Speed*, and giving a more uniform *Steady Motion* in and out of the cut (saddle not liable to break ranks) and will also save *One Half* in under a low head as other Wheel in use

Another advantage which this Wheel has over others is that it is so constructed with buckets for the discharge of water which makes the water larger and allows the draft still to be with out lifting up the Wheel

Persons wishing to adopt the BEST Wheel will do well to call and examine before purchasing elsewhere

We would also call the attention of Millers and Operators to

Valentine's Patent Reversing Centrifugal Water Wheel FOR "UPRIGHT SHAFTS"

WHICH are adapted for driving all Machinery in Manufacturing Mills and are made of different sizes to give any amount of power required. The reputation the Wheel has already acquired by the successful operation of several hundred Wheels sold and in use, we feel confident in recommending them as combining more advantages than any other Wheel for perpendicular Shafts now in use

As evidence of the merits of this Wheel we would refer to the following extracts from a letter of experiments made with the same by MARA BEARD, Esq Civil Engineer Mass who is well known as one of the most scientific and experienced practical Engineers in the country

"This wheel is formed with curved buckets depending upon the size and width of the Wheel, each extending so far around the circle that when the water arrives at the lowest point it is so far expended that it falls by its own weight from the Wheel The Wheel is made of the best of iron and the buckets are made of wood by the stationary plate under each plate What is claimed that there is no downward pressure upon the Wheel which stands perfectly free to the force of the water by this arrangement all the force of the water and bearing on the Wheel is expended upon the power saved, which in the old mills is generally lost

"This Wheel is adapted to low as well as high heads of water and will run as well as back as out of it, provided the head pressure is in fact as the back water But as Wheels in this country are generally gauged for a high head will not answer for a low one, and vice versa for as the head increases the width of the jets should be proportionally increased, so that the water may not issue with too great force and not give its best effect to the Wheel

In point of power, the trials show conclusively that this Wheel is superior to the best of Breast Wheels and it has the advantage of working with good effect in situations where the common Wheel would be worthless, as it is but little power easily accessible when they are in use costs much less in the outlay, is much more durable and takes very much less room and as there is no complicity of structure, durability of material, efficiency of application and excellence of workmanship are the grand points of recommendation for the
